WEBINAR

WaterSMART Program funding opportunities for projects to improve water management

About the Webinar: The Bureau of Reclamation will host a webinar to provide information about WaterSMART to entities in Arizona, including an overview of WaterSMART funding opportunities, eligible applicants and projects, and selection process.

Who should attend: State agencies, Indian tribes, irrigation districts, water districts, or other organizations with water or power delivery authority, non-profit organizations involved in water management activities, local watershed groups, and universities and research institutes.

The WaterSMART Program includes funding for cost-shared grants for projects to improve water management, including:

- **Water and Energy Efficiency Grants and Small-Scale Water Efficiency Program Grants** for on-the-ground water conservation and water management improvements
- **Water Marketing Strategy Grants** to conduct planning activities to develop water marketing strategies that establish or expand water markets or water marketing activities
- **Drought Response Program Grants** for Drought Resiliency Projects and Drought Planning
- **Applied Science Tools Grants** for projects to develop improved hydrologic modeling and forecasting tools and tools to support improved access to hydrologic data
- **Cooperative Watershed Management Grants** to support the development of local watershed groups and watershed planning and implementation of restoration projects
- **Title XVI Grants** for water reclamation and reuse
- **Water Conservation Field Services Program Grants** to support water conservation priorities and to meet local goals
